Toolbase® Control Top EB-60 Professional

The Toolbase Control Top Professional is a standalone control unit compatible with Toolbase EB system, and manual storage management. Its robust and modern housing provides ample space for all components, offering convenient access to the integrated mouse and keyboard for efficient on-site administrative tasks. After use, all components can be securely and compactly stored behind a lockable flap.

The system is equipped with a powerful PC featuring the pre-installed ATMS CORE BASIC software and a multi-touch-enabled monitor for intuitive operation. Additional peripherals, such as scanners and RFID card readers, are available as optional accessories.
